

FOR IMMEDIATE RELEASE

SEMPULSE ANNOUNCED AS WINNER AT MASSCHALLENGE TEXAS, ACCELERATING THEIR LIFE SAVING MEDICAL PLATFORM'S DEPLOYMENT WITH THE US MILITARY

Austin, Texas, August 16, 2018 – Sempulse is a transformative health care solution that provides medical grade efficacy with low cost deployment of a wireless, miniature bio sensor solution offering real-time vital signs monitoring in seconds on anyone, anywhere - inside or outside of hospitals.

Mike Millard, Managing Director of MassChallenge Texas said, “Sempulse came into our cohort with a phenomenal and already patented idea. They have been a highly-engaged part of our community who leveraged our team, our participants, and our expert community worldwide. It has been exciting to see their progress over the last 6 months and to see this life saving technology come to market. Many companies say they can save lives, but Sempulse delivers on that promise in a tangible fashion across the healthcare system with a medical device, software, and platform that allows first responders and doctors to continuously monitor key vital signs and save lives by detecting internal bleeding and more using their machine learning Life Analytics platform.”

Sempulse CEO Kurt Stump remarked, “The inaugural MassChallenge Texas cohort has so many great companies and amazing leaders. It is an incredible honor to accept this award on behalf of our team. MCTX challenged us, but also gave us the necessary tools, mentorship, and experience to raise funds and bring us to market. As a member of MassChallenge, we have connected with leaders and experts worldwide making our business model, go to market strategy, and production capabilities even stronger.”

Mass Challenge

MassChallenge is a global network of zero-equity startup accelerators. Headquartered in the United States with locations in Boston, Israel, Mexico, Switzerland, Texas, and the UK, MassChallenge is committed to strengthening the global innovation ecosystem by supporting high-potential startups across all industries, from anywhere in the world. To date, more than 1,500 MassChallenge alumni have raised more than \$3 billion in funding, generated more than \$2 billion in revenue, and created more than 80,000 total jobs. Learn more about MassChallenge at www.masschallenge.org.

Sempulse

Sempulse has a medical device and AI platform with offices in San Diego and Austin. A patented, non-invasive vital signs sensor adheres to the back of the ear and acquires

patients' 5 major vital signs. That's cuffless blood pressure, pulse oximetry, heart rate, respiratory rate, and core body temperature, plus geolocation and a wealth of additional information. They have developed their technology working with the Department of Defense, who determined that over half of the US fatalities in Iraq and Afghanistan were potentially survivable. The sensors are equally capable in the civilian markets with applications ranging from mass casualty, to NICU, chronic disease, post-operative, telemedicine and remote monitoring.
